

Open-core engine.

Sell time & scale, not access.

Every command, all 52 tools, the autopilot loop and local dashboard are free forever. Paid tiers add the hosted conveniences teams don't want to run themselves.

Open

\$0

self-host · BYO keys

✓ Full engine + MCP

✓ Autopilot + dashboard

✓ Ledger + attribution

1 workspace

Pro

\$59

/workspace / mo

✓ Everything in Open

✓ Hosted scheduler

✓ White-label reports

3 workspaces

AGENCY BEACHHEAD

Agency

\$249

/ mo · up to 25 sites

✓ Everything in Pro

✓ Team seats + roles

✓ Managed data

✓ White-label reseller

Enterprise

\$999+

/ mo

✓ Unlimited sites

✓ SSO + audit logs

✓ Custom connectors

✓ SLAs + support

The Agency tier replaces a ~\$1,000+/mo stack — Ahrefs (\$249) + Surfer (\$399) + a GEO tracker like Profound (\$499) — while doing what none of them do: **ship the fix and attribute the result.**

WHAT'S GATED (ONLY HOSTED CONVENIENCES)

Capability	Open	Pro	Agency	Ent.
Full engine · 52 tools · MCP · autopilot · dashboard · site-control · ledger	✓	✓	✓	✓
Workspaces (sites)	1	3	25	∞
Hosted scheduler (no cron)	—	✓	✓	✓
White-label reports	—	✓	✓	✓
Team seats + roles	—	—	✓	✓
Managed data (DataForSEO pass-through, cost +15–20%)	—	—	✓	✓
SSO · audit logs · priority support	—	prio	prio	✓

Enforced in code (edition.py); python -m seo_agent edition shows what's active. Nothing in the analysis/production/control engine is ever locked — open-core stays a real product and the distribution channel.

DATA & COMPLIANCE

BYO keys (default, every tier): you pay DataForSEO directly — sub-cent per SERP call; the vendor never touches data revenue or liability. **Managed data (Agency+):** a thin, metered, transparent proxy at cost + margin — never a flat-fee pool. No central warehouse of Google/DataForSEO data; every workspace is isolated; every change is logged to its ledger.

START

Open is `pip install` today. **Pro / Agency / Enterprise** (hosted) — the first paid surface is a hosted CLI-as-a-service. Prices are 2026-benchmarked launch targets.

SEO Content Pipeline — pricing & packaging. Open-core (free engine) + hosted editions. See [COMMERCIAL.md](#) for licensing and [PRODUCT-STRATEGY.md](#) for the full go-to-market.
